Expert Workshop

JOURNALISTS AND DATA GEEKS

Using a mask can give a sense of protection, but how can we feel truly safe if unscrupulous individuals might exploit the crisis for private gain?

The webinar will provide a beginner-friendly introduction on how to analyse corruption risks in public procurement through Big Data

COrruption
Risk Indicators in
Emergency
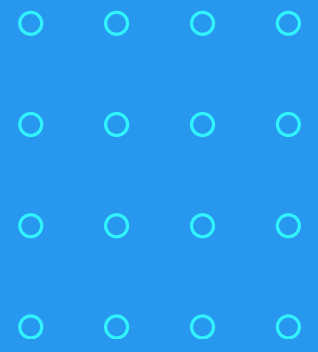

Co-funded by
the European Union

WHEN?
20 March 2024, from 10:00 to 12:00 CET

WHAT?
During the workshop, Dimitri Bettoni (DCU), Davide Del Monte (info.nodes) and Niccolò Salvini (UniPg) will explain how the CO.R.E indicators work, how to use the CO.R.E dashboard and will perform a demo of the Coresoi package for R, an innovative tool that journalists and Data Scientists can use to investigate corruption risks in their country using cutting-edge technologies.

1. Welcome and Introduction

2. Understanding the Coresoi R package and its significance for risk in public procurement during emergencies

3. Working with Coresoi
- Mesuring corruption in Emergency, a data driven approach
- Introduction to Coresoi using sample data
- Integrating Coresoi with external partner data
- Using the CORE API in R

4. Q&A and Wrap Up

The CO.RE team is actively looking for Journalists and Data Scientists to play with their package, so seize the chance to get a sneak peak into this powerful tool!
